SANDOZ

The uniqueness of Sandoz generics.

A decision guidance for
your choice of medication.

Good for you. Good for everyone. Sandoz generics.

The generics manufacturer with Swiss heritage.

For more than 125 years, Sandoz has stood for innovation, tradition and the highest quality medicinal products. Founded in Basel in 1886, we are still a Swiss company today that focuses on product quality and patient safety.

Generics are medicinal products that have the same active ingredients as the original products and are available in the same strengths and dosage form as the original. They can be placed on the market as soon as the patent of the original product has expired. Today, Sandoz offers a broad range of products of about 200 different active ingredients in over 1,000 different dosages and pack sizes.

On average, every second medicinal product is still sold over the counter in its original form despite generic alternatives. This is despite the fact that generics are subject to the same high quality requirements and are, on average, approximately 25% cheaper than their original counterparts.

We aspire to the highest quality.

Generics, just like the corresponding original products, are tested and approved using strict criteria by the Swiss regulatory authority, Swissmedic. This is beneficial for you as well as for our healthcare system.

With the help of the expertise and experience of our parent company, Novartis, Sandoz offers Swiss generics for Switzerland. Talk with your doctor or pharmacist about Sandoz generics. They can help you understand and advice you professionally.
